- 5 Local govts. & municipal authorities
- 6 Universities and research centers
- 7 Trade union NGOs
- 8 Women, gender, & youth NGOs
- 9 Regional climate actors
- 10 UNFCCC national focal points

Objectives

The Independent Global Stocktake (iGST) is a consortium of civil society actors working together to support the Global Stocktake (GST), the formal process established under the Paris Agreement to periodically take stock of collective progress toward its long-term goals.

The iGST West Africa aligns with the independent community – from modelers and analysts, to campaigners and advocates – so we can push together for a robust GST that empowers ECOWAS countries to take greater climate action. Recognizing the political realities that constrain the formal process, this iGST hub aims to go beyond the GST in ways that ensures the Stocktake moment generates maximum positive impact.

Activities

Strategic assessment of the regional climate community and stakeholders' perceptions of the Global Stocktake

Development of a pathway for the formation of the iGST West Africa Regional Hub

Official launching & operationalization of iGST West Africa Regional Hub

2022

2023

We welcome civil society climate actors to join the iGST West Africa Regional Hub
