

Climate Services for Risk Reduction in Africa 2023 Webinar Forum with West Africa

- Improvement of early warning systems and adaptation measures for disaster risk reduction, *Uni. Lomé, Lomé, Togo, 28 September 2023*
- Excessive water management, *Uni. F.H.B., Abidjan, Ivory Coast, October 2023*
- Climate-smart agriculture and sustainable landscapes, *Uni. K.N., Kumasi, Ghana, November 2023*
- Climate impacts and resilience under present and future scenarios, *Uni. C.A.D., Dakar, Senegal, December 2023*

These multilateral webinars intend to:

- *Strengthen climate resilience in Africa in order to raise awareness about climate knowledge, identify key services for adaptation to climate change and disaster risk reduction*
- *Examine potential areas for cooperation in research on climate risk management, resilience and adaptation in West Africa and thus defragment the programme landscape in favour of common goals and common impact of funding*
- *Describe pathways and priorities for research, innovation and capacity development in the area of Climate Services for Risk Reduction that contribute to the new Innovation Agenda between African Union and European Union*
- *Identify actionable and complementary steps to boost Knowledge, Innovation and Capacity (KIC) via trilateral or multilateral joint calls or actions (South-South and South-North)*
